

It is a really a matter of pride, that every year, our beloved department has organized the “REUNION”. The entire stake –holders cherish this coveted programme in the context of festivity. The broader perspective of the gala event is to cement the relationship between past and present student. We believe from the core of our heart that the department is not only what we inherited from our predecessors but also borrowed from our successors. Therefore the event is of utmost importance for our departmental stakeholders particularly student fraternity.

2014-15

On this auspicious day ex-students have the chance to revisit their campus & department and to cherish their nostalgic moments with fellow alumni. There has been a day long affair with multifaceted activities. The list of activities, starting with registration and donation from the alumni, is inauguration by head of the institution of wall magazine "BASUDHA" and publication of departmental magazine "SPHATIK". The notable qualitative and constructive activity of said gala programme reflects the hard work and constructive creativity of the students of the department. There are lots of cultural events which are performed by present students and alumni. After the aforesaid programme there is a discussion session among present and ex-students about present and future prospect of geological research and discovery as well as career option.

The day began in great excitement. It has occupied a significant niche in the department with a legacy. One notable qualitative and constructive activity of the said gala programme was continuation of publication of departmental magazine- 'SPATHIK'. Further, the liaising between ex-students and present students made themselves symbiotically beneficiary. Those who are in the professional domain promised to help each other. A continuous updating process to keep records of ex-students' present status through this reunion programme is annexed with the magazine 'SPATHIK'. A link was created for this purpose.
