

GENDER SENSITIZATION ACTION PLAN, J. K. College, Purulia

The college has always taken proactive steps to ensure that no one is subjected to discriminatory treatment based on their gender and has always dealt delicately with concerns of gender equity. The college has established the Gender Equity Cell and the Cell for the Prevention of Gender-Based Treatment or Harassment in response to this. These two committees meet on a regular basis and carry out various programs and initiatives that raise awareness among college staff members and students. International Women's Day was observed on March 8, 2022, last year, with staff, students, and several speakers emphasizing the value of gender equity. The women empowerment cell also arranged a brief cultural event to advance gender parity. Initiating an online awareness program on "The Importance of Transforming Attitude: Understanding Gender Equity Issues" on May 16, 2023, the IQAC also demonstrated initiative. This conversation centered mostly on accepting the neuter gender as a vital and essential part of the human race. Various departments were additionally notified that there had been no gender discrimination.
